

## Nov 18, 2015 – KSU Engineering Technology Center

The EE and ECET departments collaborated with the Surface Mount Technology Association (SMTA) industry group to create a student chapter, advised by Dr. Ted Grosch. SMTA provides annual scholarships and has given them to our SPSU/KSU students in past few years. The picture above shows the industry members, KSU students and faculty, during a industry seminar at the Marietta campus.

## CEET Industry Seminar Series Presents

# Design and Application of Printed Circuit Boards (PCBs)

Wed Nov 18, 2015  
 12:45-2:00pm, Building J Room 109

Atlanta Chapter and inaugural meeting of the KSU SMTA Student Association

All Electrical Engineers will work with printed circuit boards (PCBs) as these are ubiquitous and are the brains of products and systems. Come to this seminar to learn from industry experts on how PCBs are designed and built. Gain understanding on how to bring up, debug, and test PCBs. Come and see samples of rigid and flexible PCBs!

### Speakers:

Matt Kehoe, Regional Director,  
Colonial Circuits

Paul Handler, General Manager,  
Rehm Thermal Systems
