Hands On Exercise 2: Working with Variables

1. Import the HMI2 Dataset
2. Rename X3.digit.zip as zip3 and rename Facility.name as facility
3. Retain only facility, zip3, Total.Charges, County, Total.Costs
4. Create a new variable called “Total.Profit” that is computed by subtracting the Total.Cost from the Total.Charges
5. Sort the data on Total.Profit within County
6. Export to a csv file named “HMI2out.csv”
